We use commercially reasonable administrative, technical, personnel, and physical measures designed to safeguard information in its possession against loss, theft, unauthorized use, disclosure, or modification. Cookies and Similar Technology

We and our partners use various tools to collect data when you visit our sites and apps, including cookies, pixels, localStorage, and other similar technologies. Some of these technologies store data in the browser or on your device. Other technologies may use network-related or other information to recognize your device (e.g., IP address). Our Services use these technologies, for example, when you first request a web page and data is then stored on your computer or other device so the website or mobile application can access personal information when you make subsequent requests for pages from that Service. These technologies may also be used to collect and store information about your usage of the Services, such as pages you have visited, other content you viewed, and search history.

We and our partners may also use these technologies to gather personal information about how you view and use our Services and content and to connect your activity with other data we store about you. We and our partners may collect your personally identifiable information about your online activities over time and across different websites when you use the Services. The use of these technologies helps us serve you better by understanding what you are interested in, tracking trends, measuring the effectiveness of ads, saving your preferences, and storing information you may want to retrieve on a regular basis. We also allow specific, approved partners to collect data from your browser or device for advertising and measurement purposes using their own similar tools.

Your web browser can be set to allow you to control these technologies, such as whether you will accept cookies, reject cookies, or to notify you each time a cookie is sent to your browser. If your browser is set to reject cookies, websites that are cookie-enabled will not recognize you when you return to the website, and some website functionality may be lost. The Help section of your browser may tell you how to prevent your browser from accepting these technologies, such as cookies. To find out more about cookies, visit www.aboutcookies.org. Depending on the make

and model of your phone, you may be able to use device settings to opt out of the use of certain device IDs for targeted advertising.

Some browsers permit the user to send a “Do Not Track” (“DNT”) preference to websites that the user visits indicating that the user does not wish to be tracked over time and across websites. Because there is not yet a common understanding of how to interpret DNT, we do not currently respond to the DNT signal on our websites. We do, however, respond to global privacy preferences when required by law.

If you no longer wish to receive promotional marketing materials from us, you may opt out of receiving such materials.
